

Top 10 Category	Overall Priority	Component/Functionality/Task
Curation - QA	1	CMR: tagging capability (uses: parent/child, public/private/access level, associated metadata, has been reviewed, email notifications, IDN node, like, bookmark, needs review, portal, PIC badge, etc.)
Curation - Bulk Change, Granules	2	CMR: create bulk change tool for granules
Search - Query	3	CMR: access to meta-metadata (MAY NOT BE NEEDED, SEE TAGGING)
Search - Query	4	CMR: add support for Location keywords (facets) (CMR-1821)
		CMR: JSON metadata output for multi format GCMD record display (CMR-1860)
Search - Query	5	CMR: index additional fields (see below for next 10 priorities)
Search - Query	6	CMR: filter by parent/child in search results
Search - Query	7	CMR: sort results by spatial coordinates
Search - Query	8	CMR: add "NOT" search across any number of query types
Curation - QA	10	CMR: Index all fields in non-public curation datastore (for coords)
Curation - Bulk Change, Collection	11	CMR: create bulk change tool for collections
Search - SERFs	12	CMR: add SERF support in CMR
Search - Query	13	CMR: Add fielded search for any UMM-C field
Curation - Schema	14	CMR: fix UMM-C additional attributes overlap with extended metadata
Curation - docBUILDER	15	CMR: add rubric scoring and notification
Curation - QA	16	CMR: implement next set of ingest rules
Search - Query	17	CMR: add fuzzy
Search - Query	18	CMR: add boosting (+ or ~)
Curation - QA	19	CMR: mechanism (API) to identify ACL (of records) based on a user's authentication
Indexed Fields	1	Personnel
Indexed Fields	2	Ancillary Keyword
Indexed Fields	3	Detailed Variable
Indexed Fields	4	IDN Node
Indexed Fields	5	Service Keywords
Indexed Fields	6	Extended Metadata
Indexed Fields	7	Temporal Coverage
Indexed Fields	8	Related URL
Indexed Fields	9	Data Set Citation
Indexed Fields	10	ISO Topic Category
MMT	1	Fix ECHO and DIF-9 lossiness
MMT	2	Add DIF-10 support
MMT	3	Add overall validation
MMT	4	Add keyword look-ups
MMT	5	Add xml editor
